

K-LOVE, at 105.5, 89.1 and 100.9 has been a part of our life for over 6 years. It is on during the day, in the evening, in our cars, in our teens bedrooms while they study. It is an integral and important part of building up our community with its positive message. If K-LOVE was displaced by a LPFM broadcaster, it would be devastating to not only our family but 100's of others we personally know depend on it. I know of teens who were stopped from even committing suicide because they stumbled on 105.5. This station is providing a service that is most definitely in the public interest...just ask the parents of those teenagers who changed the direction of their life in a positive direction.
